Medical Tourism Facilitator
by the GHA**

.. Just a word

As an International Medical Tourism Facilitator, MEDI TOUR always aims on penetrating diverse markets with leading and competitive strategies, providing its clients result-oriented services while ensuring continuous business scalability.

The Management

THE COMPANY

→ WHO WE ARE

MEDI TOUR is a Lebanon-based Medical Tourism Facilitator, certified from the GHA – Global Healthcare Accreditation in the USA; that acts as a liaison for worldwide patients, especially those who are located in the MENA region and looking for medical treatments abroad.

Our experience proficiency in medical tourism, in addition to understanding the essence and the procedures of this sensitive field, and offering our clients global class services at competitive rates would easily prioritize us as industry leaders.

→ OUR MISSION

As a Medical Tourism Facilitator, our aim is to constantly evolve by obtaining the absolute standards in the medical tourism market, fulfilling customer expectations by providing excellent package of services.

→ OUR VISION

To deliver high-end quality medical tourism services at affordable costs, partnering with elite medical centers, hotels, airlines, travel agencies, and to become one of the industry leaders across the globe.

→ WHY CHOOSE US

The medical tourism is a growing sector and is becoming a worldwide trend, with approximately 40 billion USD in turnover. The industry has played a significant role in increasing the GDP of several countries who have adopted and invested in medical tourism.

MEDI TOUR provides solid service advantages, unlike other regional and/or International MTF, including:

- ✓ Affordable treatments/programs
- ✓ Premium business and medical/travel standards
- ✓ Proven spoken languages depending on the chosen country
- ✓ Accreditation from the GHA in USA

Medical Vacation

In recent years, there has been an interest in finding an opportunity to combine treatments or health procedures with holidays. To meet these demands, MEDI TOUR stands in the forefront by providing its ideal offers in terms of quality of services and goal achievement for a better quality of life.

→ SERVICE COMMITMENTS

Cost of Services

What distinguishes MEDI TOUR from others, is the level of its service providers that it deals with (medical centers, hotels, airlines, etc.), who offer competitive prices for medical tourists.

Safe Treatments

Most of medical centers that MEDI TOUR partners with, are accredited and certified from the **Joint Commission International (JCI)**, which stresses on the important criteria of the top-end quality in healthcare services.

HOW WE OPERATE

→ OUR ROLE

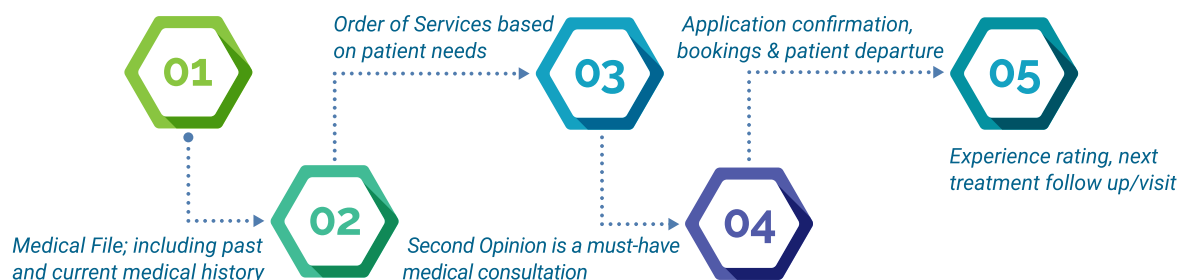

Our first and foremost responsibility is to maintain all necessary arrangements for the patient upon selecting his desired country and diagnosing his needs/treatments by the selected medical center.

Then we will:

- ✓ Obtain the patient's medical file
- ✓ Share the file with the relevant medical center for second opinion and initial consultation
- ✓ Collect multiple price offers (medical centers, hotels, airlines) to provide the best package/plan
- ✓ Schedule the necessary procedures for patient processing
- ✓ Book all accommodation/travel arrangements
- ✓ Collect post-treatment experience feedback
- ✓ Follow up reminder for the patient's next treatment/visit

For most cases, prospective patients/clients will be provided with a convenient all-inclusive quote depending on the medical situation, package selection which includes medical center, hotel, airline ticket, and/or additional service charges.

→ 5-WORKING STEPS

→ SERVICE PROVIDERS

MEDI TOUR has over 120 worldwide service providers. As a Medical Tourism Facilitator, we ensure that the patient is smoothly and well-treated from the moment he is approached until he returns to his home country.

The service providers (medical centers, hotels, airlines) we deal with, have proven and reputable history within their working field, and provide us with the best pricing rates.

We are keen on offering our patients top notch services. Our service providers' network is constantly evolving as we are partnering with International industry leaders in both, medical and travel sectors.

→ SOME OF THE SERVICE COUNTRIES

Lebanon is one of the most dynamic healthcare markets in the Middle East with world class standards. The country is proving growing medical tourism and cosmetics surgeries sectors, and considered as a regional hub for medical treatments, giving the proximity of distance, language, and culture.

Germany is an increasingly popular destination for medical travelers. Its high quality of care, strict ethical standards and quick access to specialists make it an attractive destination for medical care. Medical care in Germany also has an affordable cost-to-quality ratio.

Turkey is providing better quality treatments at affordable costs when compared to Europe and USA. Medical tourism in Turkey has become a booming sector, where most visitors come from the GCC, Europe, Russia and other destinations to undergo various surgeries.

Cuba operates a special division of hospitals specifically for the treatment of foreigners and diplomats. Foreign patients travel to Cuba for a wide range of treatments including oncology, diabetic foot, eye-surgery, neurological disorders such as multiple sclerosis and Parkinson's disease, cosmetic surgery, addictions treatment and orthopedics.

India is known in particular for heart surgery, hip resurfacing and other areas of advanced medicine. The country's advanced facilities, skilled doctors and affordable treatment make it an ideal destination for medical tourists. Aside from modern medical practices, India has also promoted traditional practices that promote overall well-being and health.

U.A.E. was ranked one of the top 10 most efficient worldwide healthcare systems in 2018. The ranking is based on a variety of factors, including destination environment, patient experience, high levels of medical tourism, and the attractiveness of traditional tourism.

Jordan has seen an increase in medical tourism over the years. High quality standards in healthcare are vouched for by the numerous International and domestic accreditations most hospitals have earned, in addition to the extremely attractive costs.

OUR OFFERINGS

IN DETAILS

PLASTIC SURGERIES

Aesthetic plastic surgeries require that the patient chooses a highly trained and qualified plastic surgeon. If the patient plans to travel outside his home country, then MEDI TOUR ensures on providing ultimate clinical facilities with optimum service standards.

Lebanon, Turkey, and Cuba hold countless features to be one of the top destinations for those who are looking for plastic surgeries. Innumerable plastic surgeries are done in these countries, using the latest techniques and methods, whether surgical cosmetic procedures or non-surgical procedures.

→ SURGERY TYPES

- ✓ Breast Surgeries
- ✓ Nose Surgery (Rhinoplasty)
- ✓ Body Shaping
- ✓ Hair Implant
- ✓ Liposuction
- ✓ Laser Applications
- ✓ Face Stretching
- ✓ Neck Lifting
- ✓ Jaw Expansion or Reduction
- ✓ Surface Injection of body fat
- ✓ Brow Lift
- ✓ Reconstruction after head or neck cancer

Today, patients can acquire plastic surgery in Lebanon, Turkey, Cuba, and other countries at more reasonable prices, comparing to International prices. Most of these procedures are ideal for patients that are planning to revolutionize their look, especially for those who need to get rid of some belly fat, get a bigger breast shape or get rid of some wrinkles.

In recent years, the amount of discomfort experienced during and after surgery has been greatly reduced thanks to recent innovations in technology and cosmetic surgery techniques.

WEIGHT LOSS SURGERIES

Weight loss surgeries help people with extreme obesity to lose weight. It may be an option if a patient is unable to lose weight through diet and exercise, or suffer from serious health problems caused by obesity.

Many people who undergo the surgery lose weight in a short period of time, but regain some of weight as times passes. If the patient follows a diet program and exercise recommendations, he can keep most of the weight off. In addition, the patient must dedicate to a medical follow up post-surgery for the rest of his life.

MEDI TOUR and through its medical service providers, help people who are looking to undergo with such operations and assist them on finding the convenient and suitable medical professionals with affordable prices.

What are the surgical options?

Surgeons use three types of operations:

1. Laparoscopic adjustable gastric band
2. Gastric sleeve surgery, also called sleeve gastrectomy
3. Gastric bypass

→ SURGERY BENEFITS

Medical tourism has in the past decade, made a sizable breakthrough, particularly involving specialized weight loss procedures. In fact, millions travel across borders just for bariatric surgeries like incision-less weight loss surgeries including gastric sleeve and gastric bypass.

Aside from the surgery cost, there are additional benefits such as: Long-term remission for type-2 diabetes, improved cardiovascular health, relief of depression, eliminate obstructive sleep apnea, joint pain relief, improve fertility, and help reduce pregnancy complications.

Gastric sleeve patients lose between 60 and 70 percent of their excess body weight within 12 to 18 months, on average. Gastric bypass surgery is generally recommended for obese patients with a Body Mass Index over 45.

QUALITY OF LIFE PROGRAM

Among the medical programs, the Quality of Life Program is distinguished, focused on the rehabilitation programs, well-being, and the individual's health. The prevention of health and the precarious diagnosis of illnesses constitute one of the best ways of having a longer and healthier life. Our medical service providers have the best professionals and a wide group of medical specialists who are in charge of promoting beneficial, well guided lifestyles and designed to decrease risk factors for chronic illnesses. Quality of life encompasses more than activities of daily living, health states, disease categories, or functional ability, because it directs attention to the more complete social, psychological, and spiritual being.

As an International Medical Tourism Facilitator, and through the finest partnerships with our service providers from around the globe, MEDI TOUR engages and offers various affordable Quality of Life programs that meet its clients/patients' expectations and satisfaction.

PHYSIO
THERAPY

EASTERN
MASSAGE

THALASSO
THERAPY

→ PROGRAM TYPES

- ✓ Nutrition
- ✓ Physiotherapy
- ✓ Eastern Massage
- ✓ Thalassotherapy
- ✓ Aerobic Exercises
- ✓ Taishi and Dancing Therapy
- ✓ Exercises of Holistic Medicine
- ✓ Integral Psychological Evaluation

MEDI TOUR offers the Quality of Life programs in Lebanon, India, Turkey, Thailand, Czech Republic, Bali, and Cuba.

The main principle dimensions of Quality of Life are: material living conditions, productive or main activity, health, education, leisure and social interactions, economic security and physical safety, governance and basic rights, natural and living environment.

CARDIOLOGY PROGRAM

With the exception of heart transplants, MEDI TOUR and in coordination with the relevant medical centers in several countries, facilitates the full range of cardiological treatments.

These centers include professional cardiologists and surgeons, who are supported by a wider system of radiology, emergency medicine, anesthesia, intensive care, infectiology, and general internal medicine to complement procedures.

MEDI TOUR strives for the highest and best medical standards, and believes that the more accurate the diagnosis, the more effective the treatment is. In addition, MEDI TOUR is keen to find solutions, comfort, and efficiency by providing targeted services that the customer or patient aspires to.

The medical centers that MEDI TOUR contracts with, have a clear healthcare vision, which is focused on:

1. Comfort
2. Diagnosis
3. Prevention
4. Recovery

MEDI TOUR is dedicated to deliver one-stop service from start to finish, 24 hours a day, 7 days a week, with a fully trained and experienced team of advisors and interpreters to coordinate all your medical, travel, accommodation, leisure and other needs seamlessly and professionally.

**Health is everyone's most important asset,
take care of it!**

17.9 million people die each year from cardiovascular disease, an estimated 31% of all deaths worldwide. 85% of all CVD deaths are due to heart attacks and strokes.

ONCOLOGY PROGRAM

The development of oncology illnesses as a discipline during the past decade, is largely due to the advances that have been made in the knowledge and diagnosis of oncological diseases, from the complex mechanisms of carcinogenesis, advances in biology and various therapeutic developments as well as to new drugs and therapeutic strategies.

The medical centers that MEDI TOUR deals with, possess an experienced service of clinical oncology endowed with the most modern technologies for the pre-cautious diagnosis of the malignant illnesses.

MEDI TOUR and with the prestigious medical service providers, takes serious measures and intensive care to patients with monoclonal antibodies, and offers therapeutic programs in all oncology illnesses using modern immunologic treatments for guaranteed results.

When a patient is approached for such treatment, MEDI TOUR is very delicate and keen on providing a smooth, motivational medical process from the moment of patient departure, until he is fully recovered.

The development of natural products that offer a better quality of life, is being distinguished among the therapeutic lines that the services offer. The making up of personalized programs for patients without healing therapeutic possibilities, makes of the terminal patient's care a possibility of attention. The cancer treatment requires at present, the cooperative effort of multiple specialists.

There are several types of drug therapy for cancer: immunotherapy, conventional chemotherapy, targeted or biologic therapies, radiotherapy, and hormone therapies.

DIABETIC FOOT TREATMENT

People with diabetes are prone to foot problems that develop due to prolonged periods of high blood sugar levels. Diabetic neuropathy and peripheral vascular disease are the two main foot problems that occur, and both can have serious complications.

MEDI TOUR has the ability to facilitate and provide the diabetic foot treatment, mainly in Lebanon and Cuba with a novel and unique medication prescribed for the therapy of complex ulcer of the diabetic foot (UPD).

The patient is prepared by vascular specialists, in addition to nutrition and rehabilitation experts, to receive the appropriate treatment, as well as the use of physical methods such as magnetic treatments, ozone therapy, and others.

EFFECTS OF DIABETES

WEIGHT DISORDERS

INSULIN INJECTION

Wound Care

Many of the largest community hospitals now have wound care centers specializing in the treatment of diabetic lower extremity wounds and ulcers, along with other difficult-to-treat wounds.

In these multi-disciplinary centers, there are specialists including doctors, nurses, and therapists who work with the patient and their doctor in developing a treatment plan for the wound or leg ulcer. The treatment plans may include surgical debridement of the wound, improvement of circulation through surgery or therapy, special dressings, and antibiotics. The plan may include a combination of treatments.

The lifetime risk of people with diabetes to develop a foot ulcer is 34%; more than 50% of diabetic foot ulcers become infected. Therefore, and with the novel products that are available worldwide, the patient can avoid foot amputation.

PARKINSON TREATMENT

While Parkinson disease typically affects older adults, it can occur earlier in life as well. Striking approximately 1 percent of the population, the condition is slightly more common in men and usually begins to manifest between the ages of 50 and 65.

The symptoms are caused by a gradual degeneration of nerve cells located in the region of the brain responsible for controlling movement.

Based on MEDI TOUR's partnerships with the specialized medical centers, patients can now have access to latest medical treatments for the Parkinson disease (PD).

→ TREATMENT TYPES

- ✓ Supportive therapies, such as Physiotherapy
- ✓ Medication

MEDI TOUR's service providers will investigate prognostic outcomes and utilization of medical services by patients diagnosed with the Parkinson disease, and to identify predictors of such use.

The patient may work with rehabilitation specialists to manage problems with walking, speaking, and other aspects of daily life.

The medical team also includes nurses, social workers, physical, occupational and recreational therapists and other specialists.

Our service providers' specialists prove, collaborate, and offer the patient the best possible outcomes, safety and service.

There is no one-size-fits-all treatment approach when it comes to PD. However, medication is the most common treatment, along with some lifestyle modifications.

ORTHOPEDIC SURGERIES

In the past few years, hundreds of thousands of people are traveling outside their home countries for health care, due to the rising cost of medical treatments sends them abroad in record numbers.

Around 25 to 35% of people who are traveling for medical treatments each year, are looking for some sort of elective medical procedure, including Orthopedic procedures.

Medical tourism originated in the 1990's with cosmetic procedures. Today, a large percentage of patients travel for common Orthopedic procedures—hips, knees, spine fusions, etc. There is no rule of thumb, but for any joint procedure typically costs the patient less comparing to their home countries. This trend is driven by economics, demographics, globalization and technology, and cannot be ignored.

This huge scale and logistics becomes as simple as calling MEDI TOUR, which will take care of the whole process within 5-working steps from end to finish.

Orthopedic surgeons provide medical and surgical treatment of spine, shoulder, hip, knee, foot, ankle, leg, arm, and hand disorders of the musculoskeletal system.

They also take care of trauma, including sprains, strains, contusions, broken bones, sports injuries, arthritic conditions, infections, metabolic disorders, and tumors.

These doctors coordinate your care with other physicians, including internal medicine, general surgeons, radiologists.

**You don't have to live in pain anymore.
The physicians of MEDI TOUR's service providers are ready
to diagnose and treat all conditions and injuries of the
musculoskeletal system, no matter their complexities.**

Orthopedic practices are primarily recognized for their surgical expertise, performing well-known procedures such as ACL surgery, total hip replacement and rotator cuff repair.

GENERAL HEALTH CHECK PROGRAM

Almost every medical center that MEDI TOUR partners with, provides experienced teams of specialists, personal services and confidentiality of information. The general health check program guarantees a complete list of tests and examinations required to spend one full day at the medical center.

How often should you get a medical checkup?

MEDI TOUR believes that preventive care is a wise investment.

Most recently, worldwide medical groups suggest that medical checkups be referred to as Periodic Health Assessments or Examinations and that they be performed every five years (for adults over 18) until age 40 and every one to three years thereafter.

→ PROGRAM CHECKLIST

- | | | |
|--|------------------------------|-----------------------|
| ✓ Cardiac Evaluation | ✓ Colonoscopy | ✓ Audiogram |
| ✓ Laboratory Screening Test | ✓ Total Body CT Scan | ✓ Eye Exam |
| ✓ Pulmonary Function Test | ✓ Bone Densitometry | ✓ Body Fat Assessment |
| ✓ Medical History & Physical Examination | ✓ Prostate Health Evaluation | ✓ Skin Examination |

Call or reach us on support@meditour-me.com and book your consultation for the General Health Check Program

Health screening is an important part of disease prevention. Screening involves testing or checking for conditions in their early stages before symptoms have developed, to help improve outcomes.

STEM CELLS TREATMENT

Stem cells are the body's raw materials — cells from which all other cells with specialized functions are generated. Under the right conditions in the body or a laboratory, stem cells divide to form more cells called daughter cells.

With MEDI TOUR, the focus on such advancements is unlimited. Stem cells tourism is a small but growing part of the thriving global medical tourism marketplace. At the same time, this new but rapidly growing market for stem cells tourism is a reflection of the global reach which MEDI TOUR seeks for, with perceived benefits such as, potential significant impact on quality of life and taking control over their illness.

→ TREATMENT PACKAGES

- ✓ Beauty (Face / Hair / Neck)
- ✓ Rejuvenation (Basic / Advanced / Premium; based on stem cell type and condition)
- ✓ Gynecology (including ovarian dysfunction)
- ✓ Urology

→ OTHER DISEASES TREATED WITH STEM CELLS TRANSPLANTS

- ✓ Spinal Cord Injuries
- ✓ Type-1 Diabetes
- ✓ Parkinson Disease
- ✓ Alzheimer Disease
- ✓ Heart Disease
- ✓ Stroke
- ✓ Cancer and Osteoarthritis

MEDI TOUR cooperates with elite medical & research centers that provides stem cells treatment for a wide variety of diseases following exceptional quality and safety standards that only use Mesenchymal Stem Cells produced in a completely licensed and certified laboratory. Dosage and type of stem cells material are chosen by certified doctors for each patient individually.

While stem cells can be derived from embryos, they are also found in abundance throughout the body from muscles, tissues, organs, bone marrow and fat, from where they can be easily extracted.
